CARMELCREST

Sector: Healthcare
Client: Mid Essex Hospital Services NHS Trust
Value: £850,000
Duration: 14 Weeks

Carmelcrest was awarded this contract following a competitive tendering process, with the hospital requiring the complete refurbishment of the St. Andrew's Hand Trauma Suite. The challenge presented by the client was to complete the project within a tight programme while ensuring quality was of a very high standard.

The works undertaken included:

- Full Mechanical package, including new AHU and duct work installation;
- Full Electrical package, including emergency and theatre lighting throughout;
- Partioning of 8nr wall types for various degrees of clinic wall;
- Suspended ceiling system installed at various heights throughout;
- Fire alarm detection and void detection installation;
- Medical gas and vac installations;
- Internal refurbishment of specialist hand trauma suite;
- Construction of 11nr dirty and clean utility consultant rooms to individual specifications;
- Construction of multiple reception areas to suit client requirements;
- Toilet refurbishments throughout, including all accessible toilets, staff toilets and changing areas.

Carmelcrest added value to the project at every opportunity, exceeding our client's expectations, for example by increasing the medical gas installation from Bar 3 to Bar 7, as well as providing additional mechanical installations.

All elements of the project were completed to a high standard while staying within the client's budget and specified programme.
